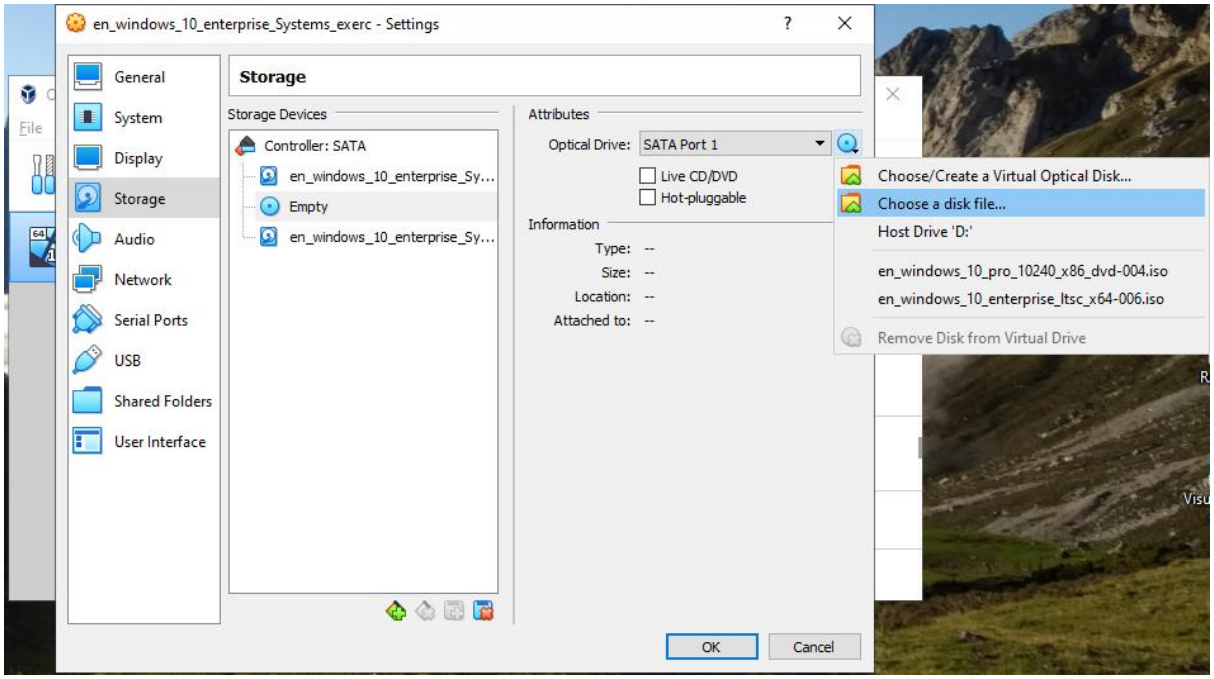
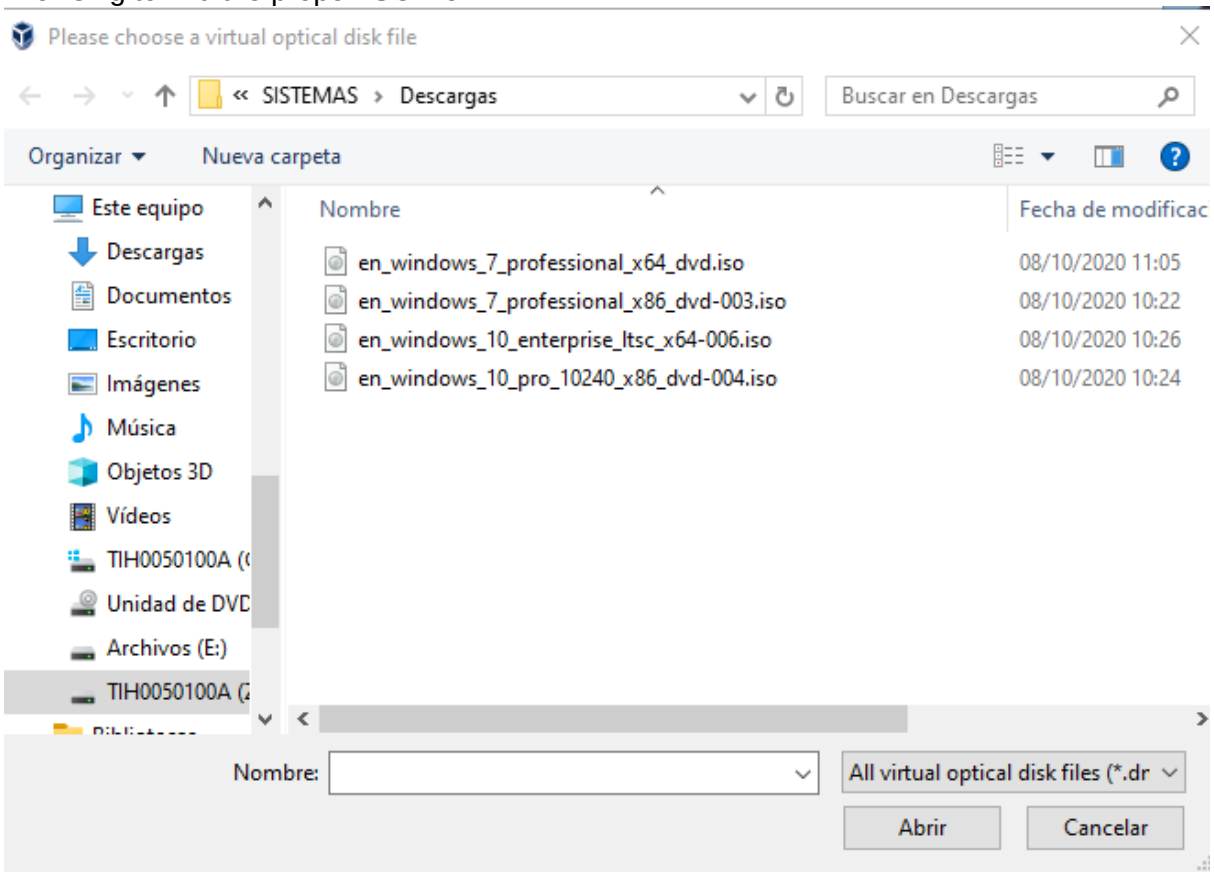
2. Install Windows 10 in the virtual machine from exercise 1. You must add the following
settings:
• USB 3.0 support.
• Shared folders.
• Internet connection including access to the rest of computers of the network.
• You will be able to copy and paste from the host to the guest and vice versa.

Adding new OS to Virtualbox

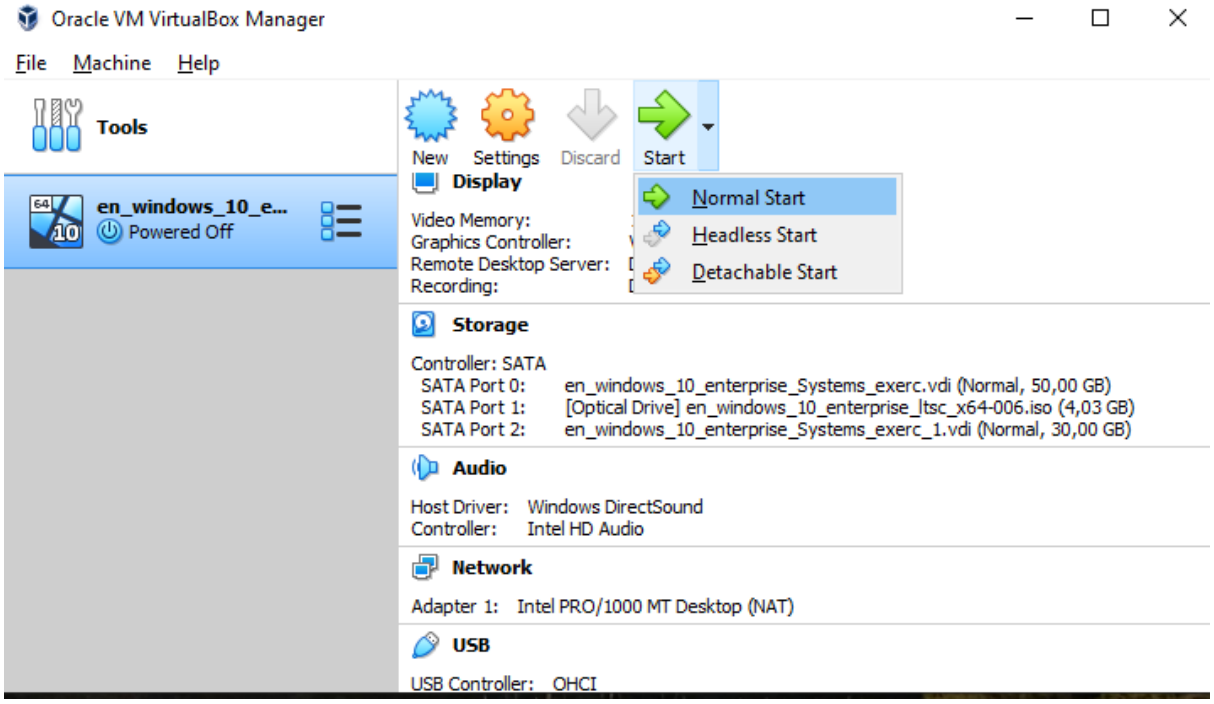
In the menu “storage”, clicking the link Optical Drive and after that in the blue disk icon “choose a disk file”



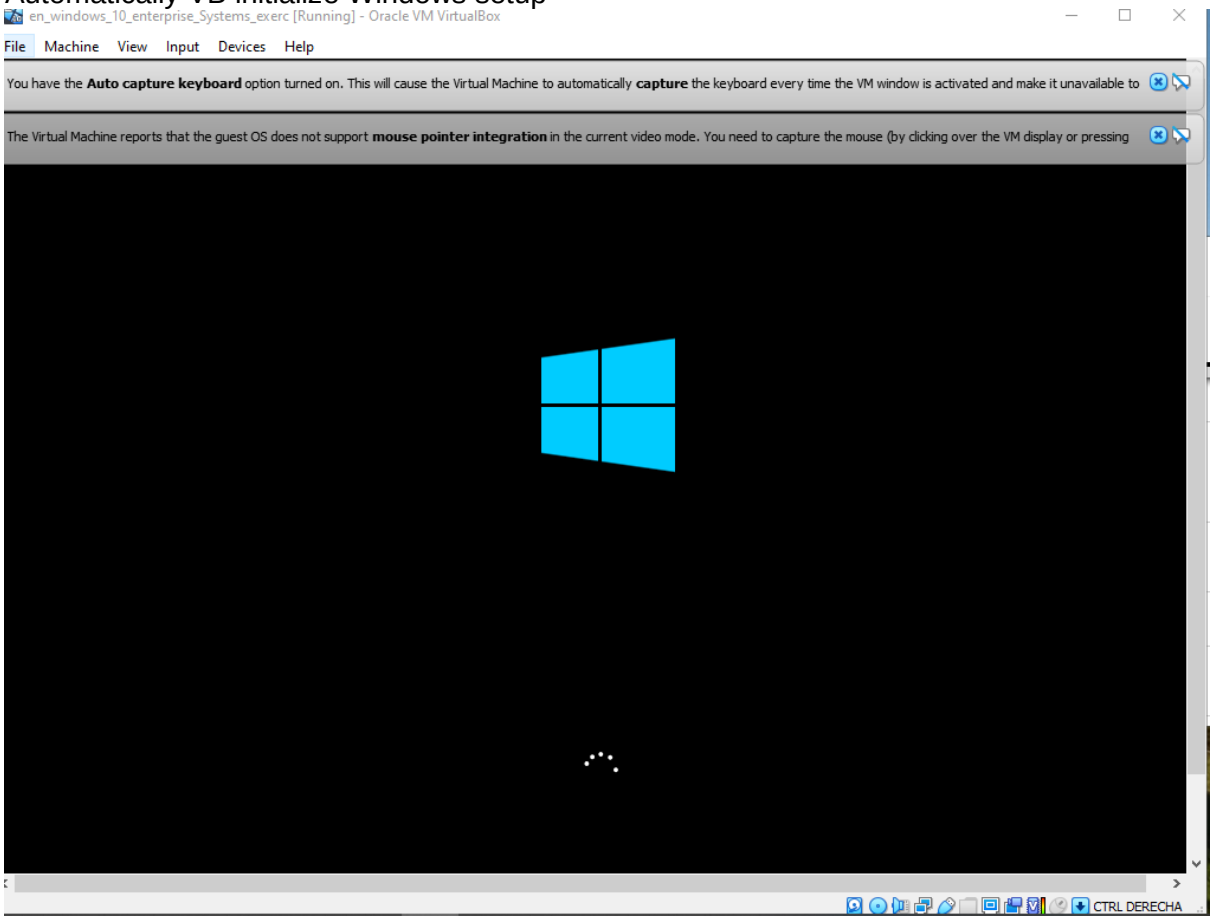
Browsing to find the proper ISO file



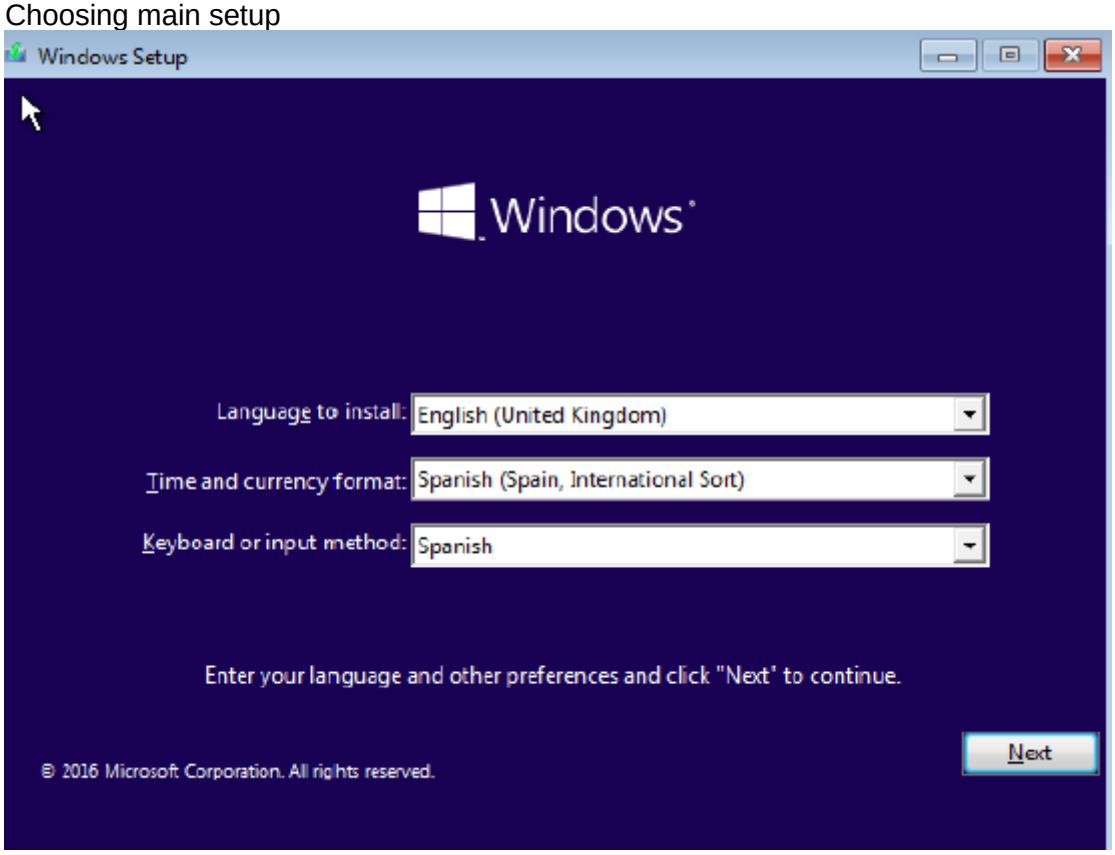
From the main menu, clicking ”normal start”



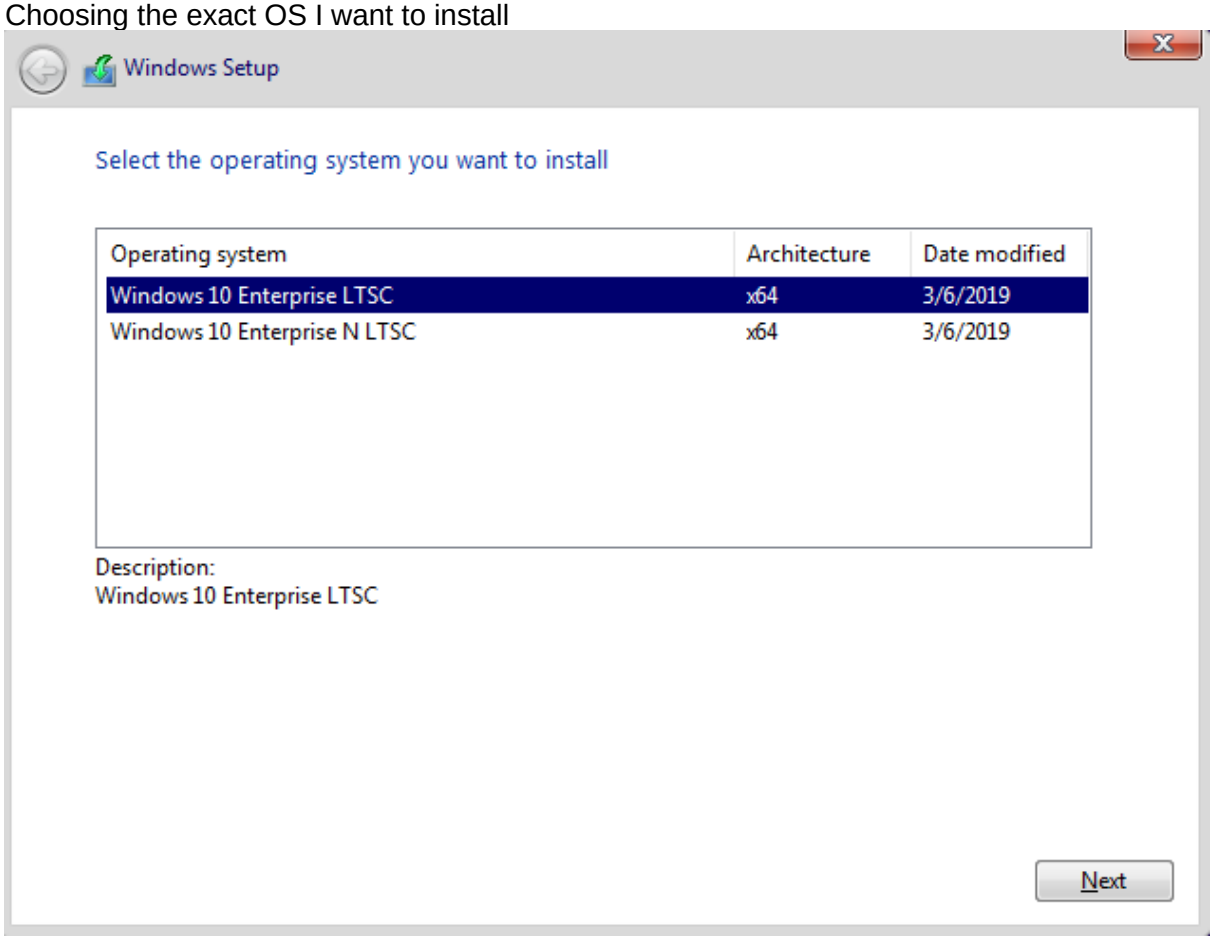
Automatically VB initialize Windows setup



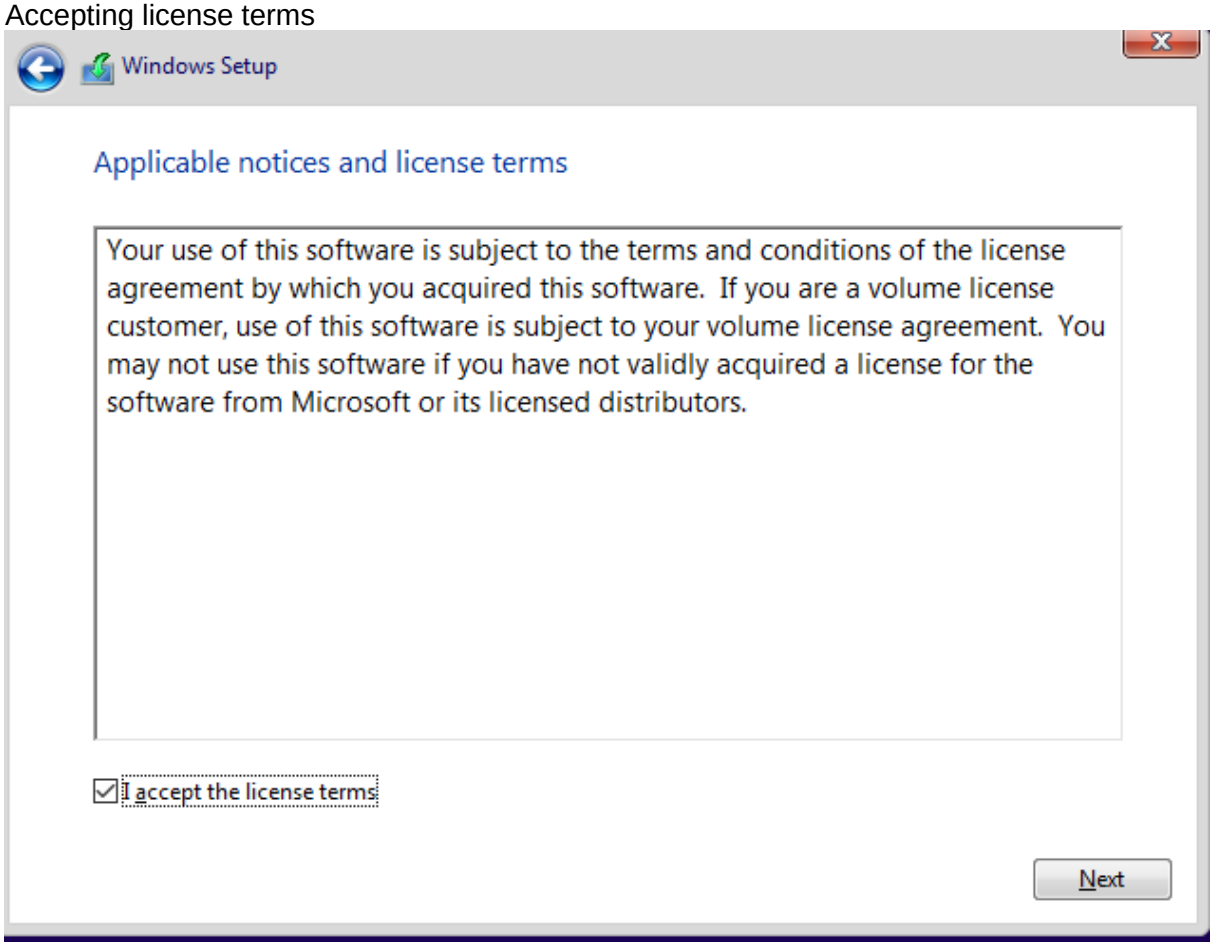
Choosing main setup



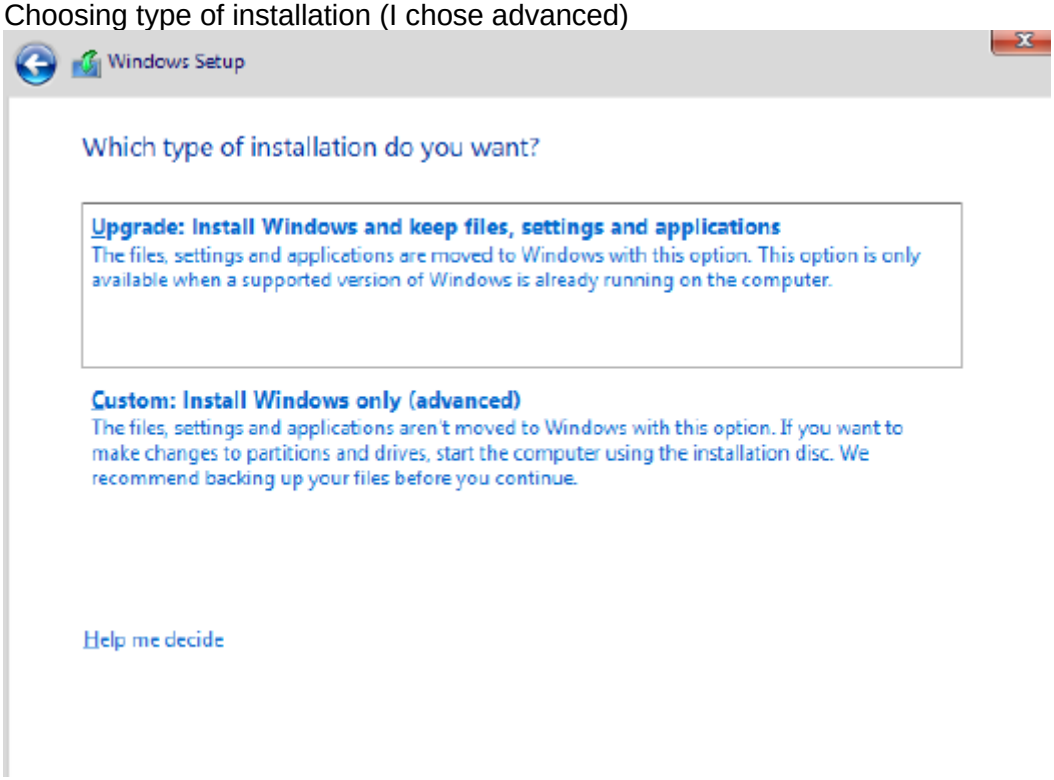
Choosing the exact OS I want to install



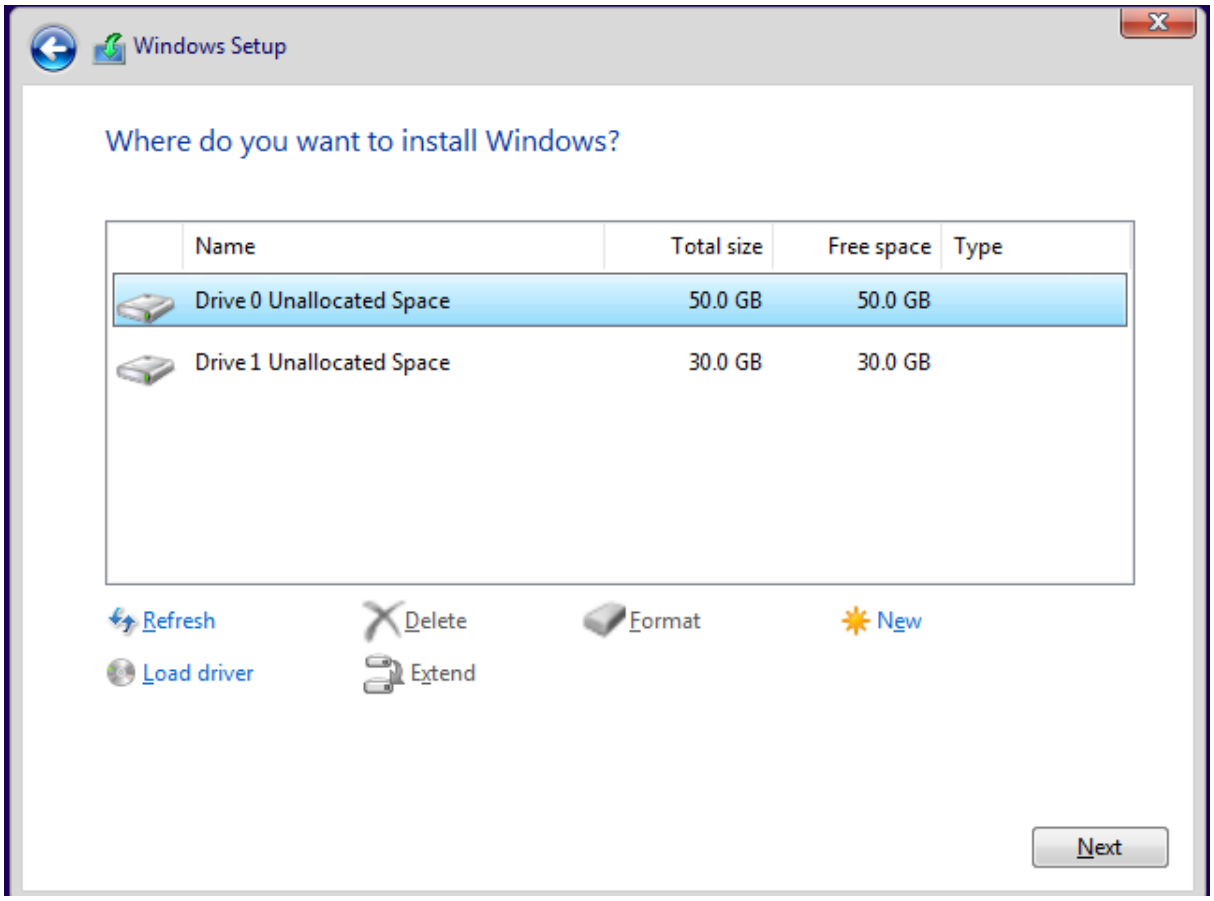
Accepting license terms



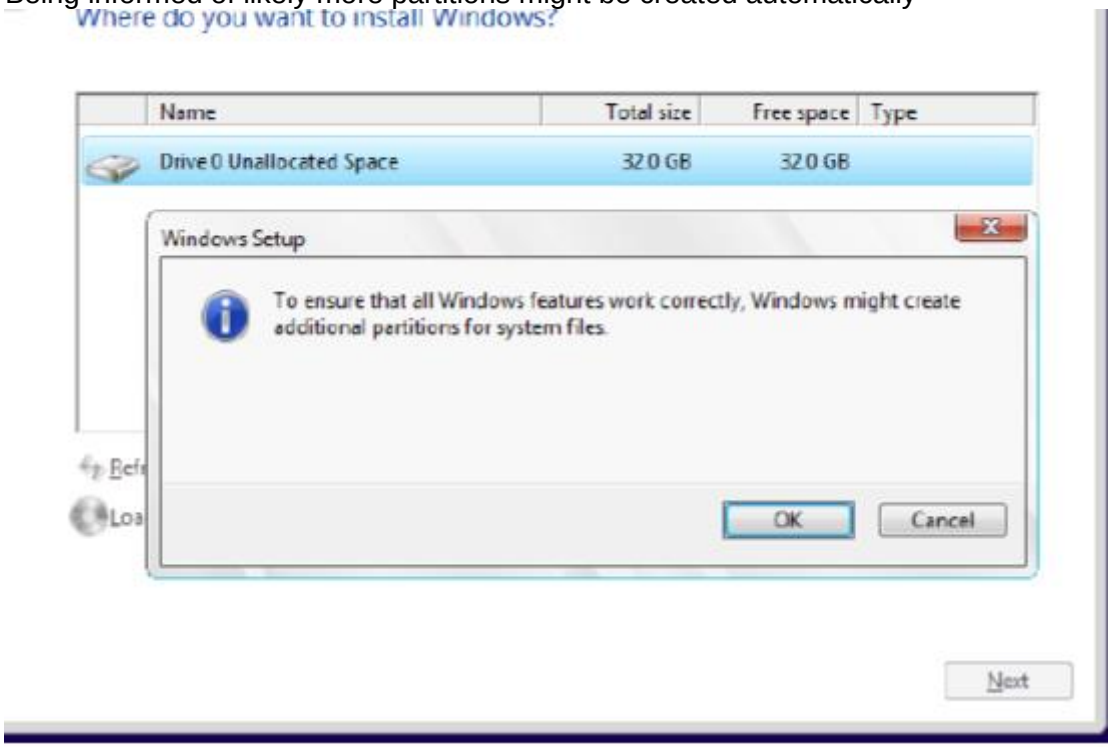
Choosing type of installation (I chose advanced)



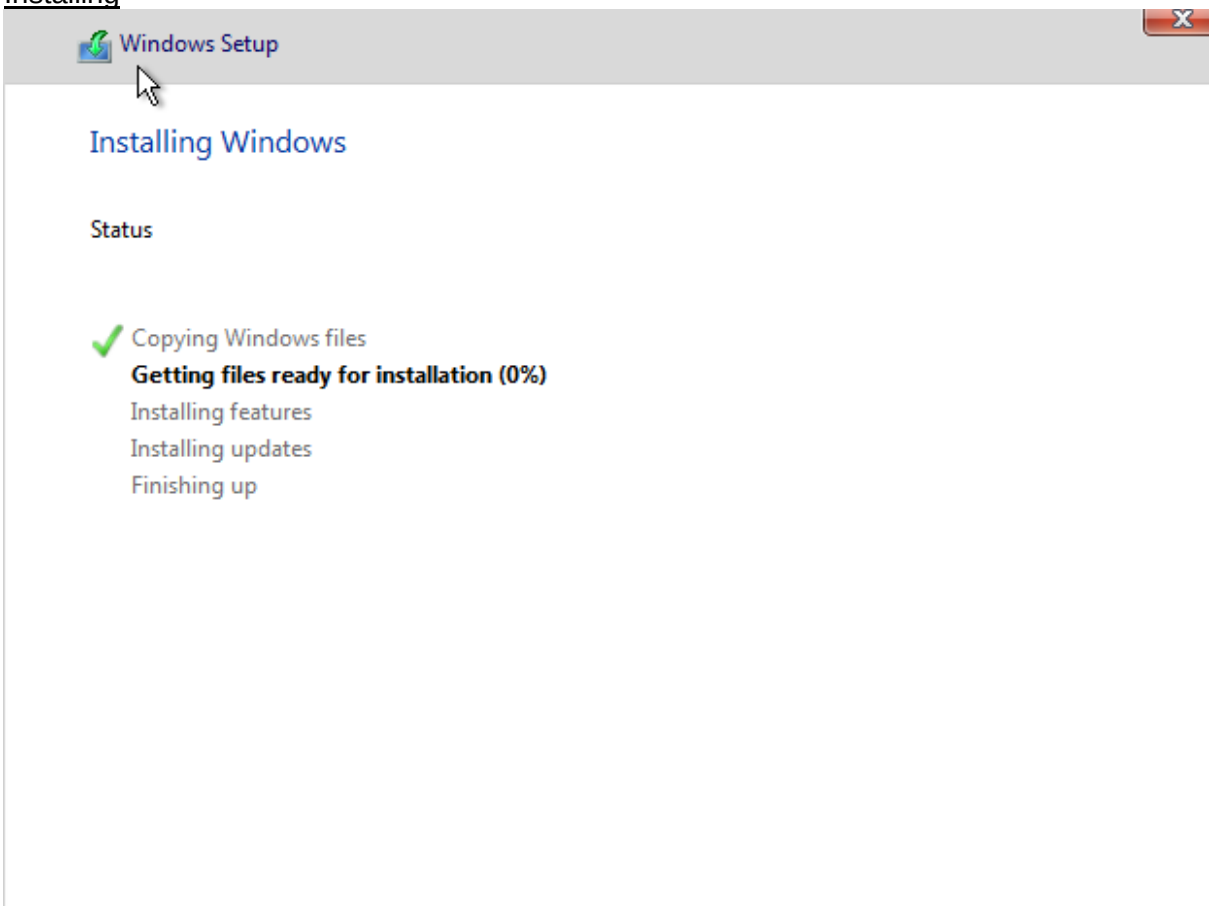
Choosing the 50 GB partition to install it in



Being informed of likely more partitions might be created automatically

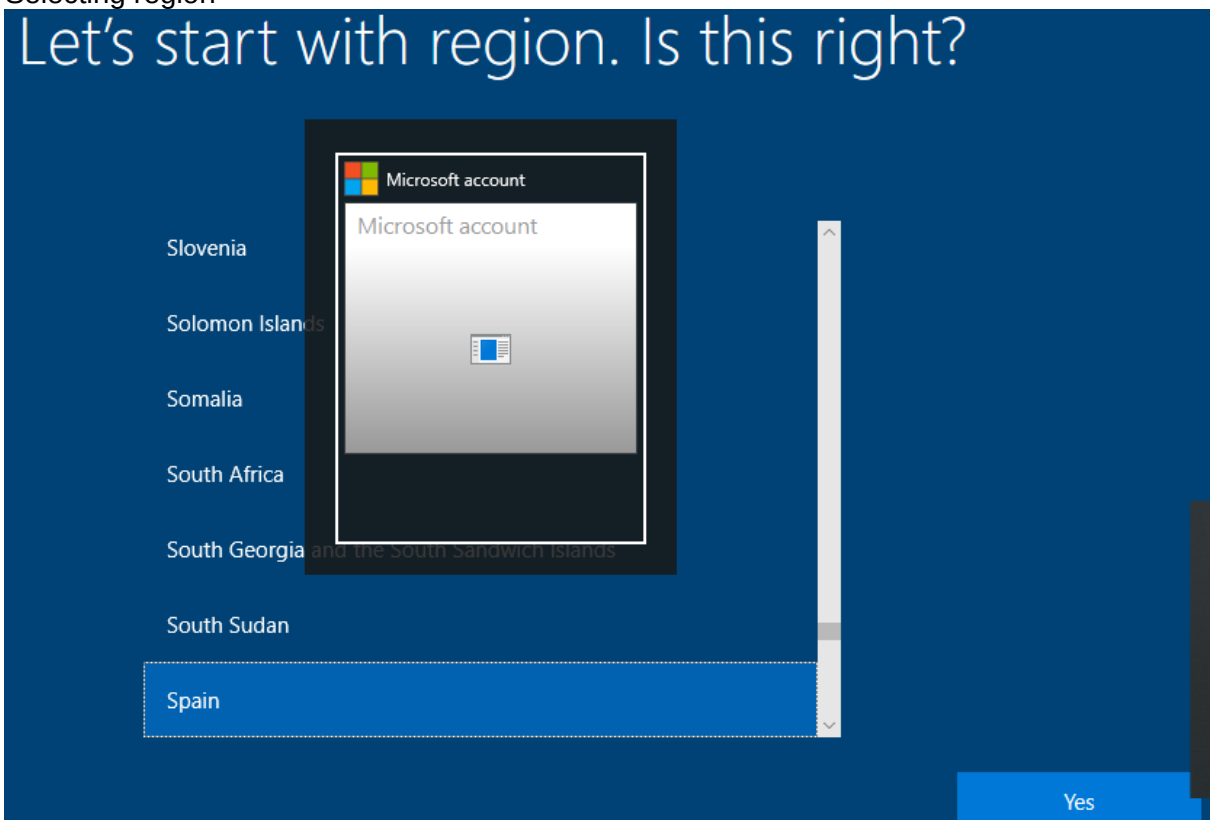


Installing

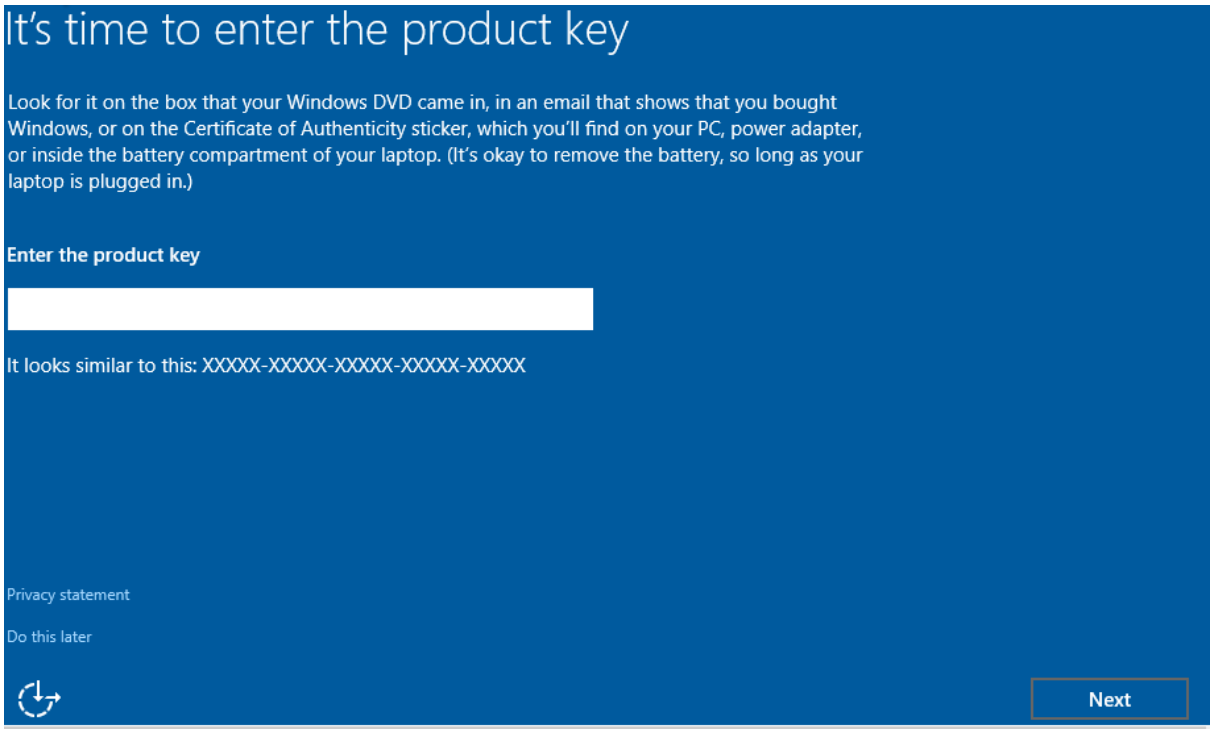


Windows Setup
Installing Windows
Status
Copying Windows files
Getting files ready for installation (0%)
Installing features
Installing updates
Finishing up

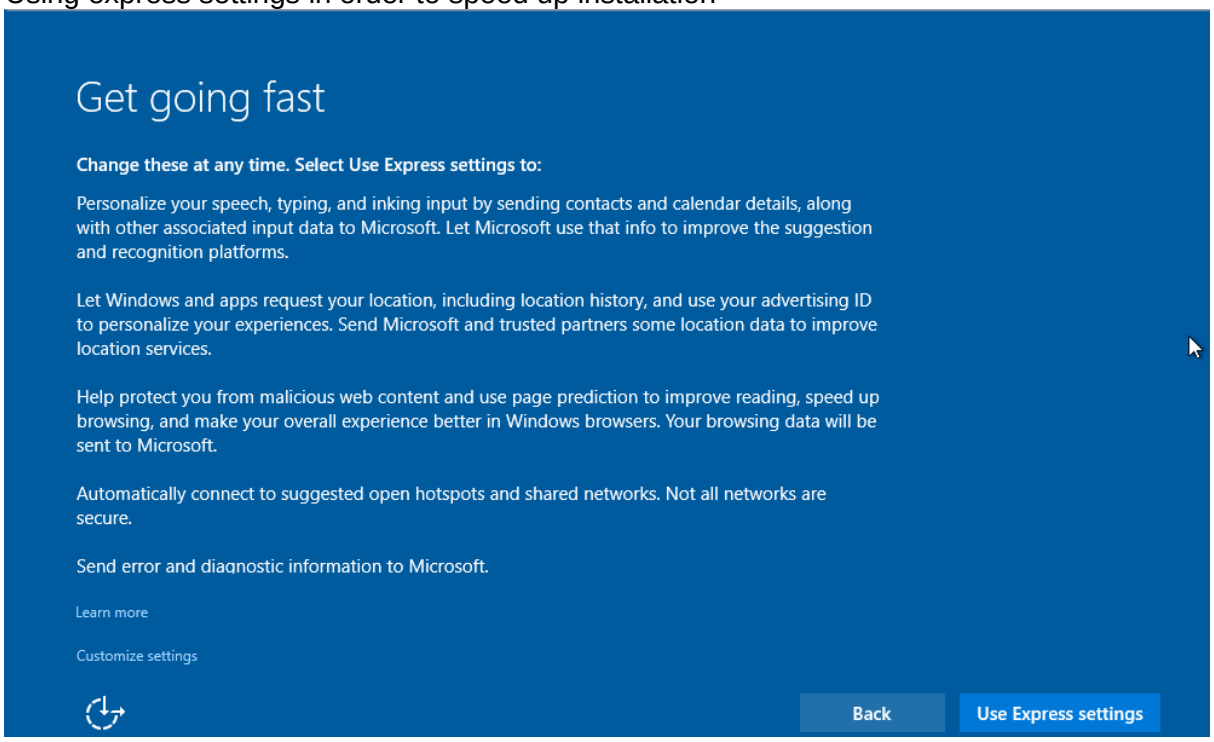
Selecting region



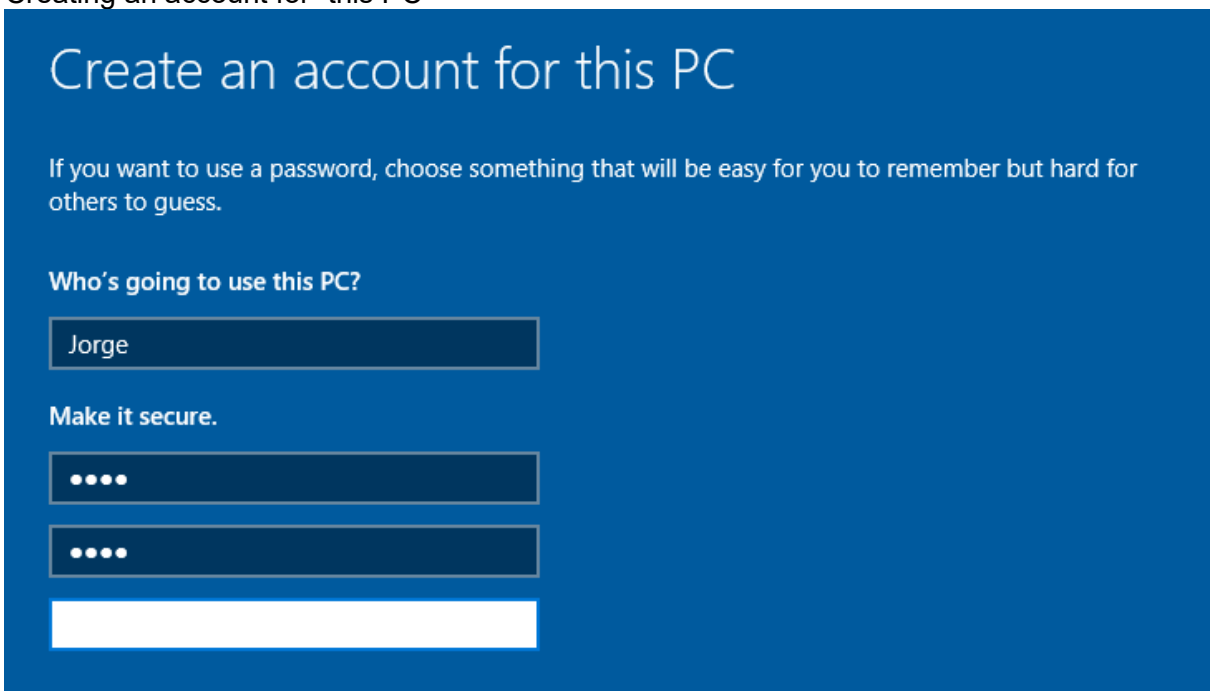
Skipping product key



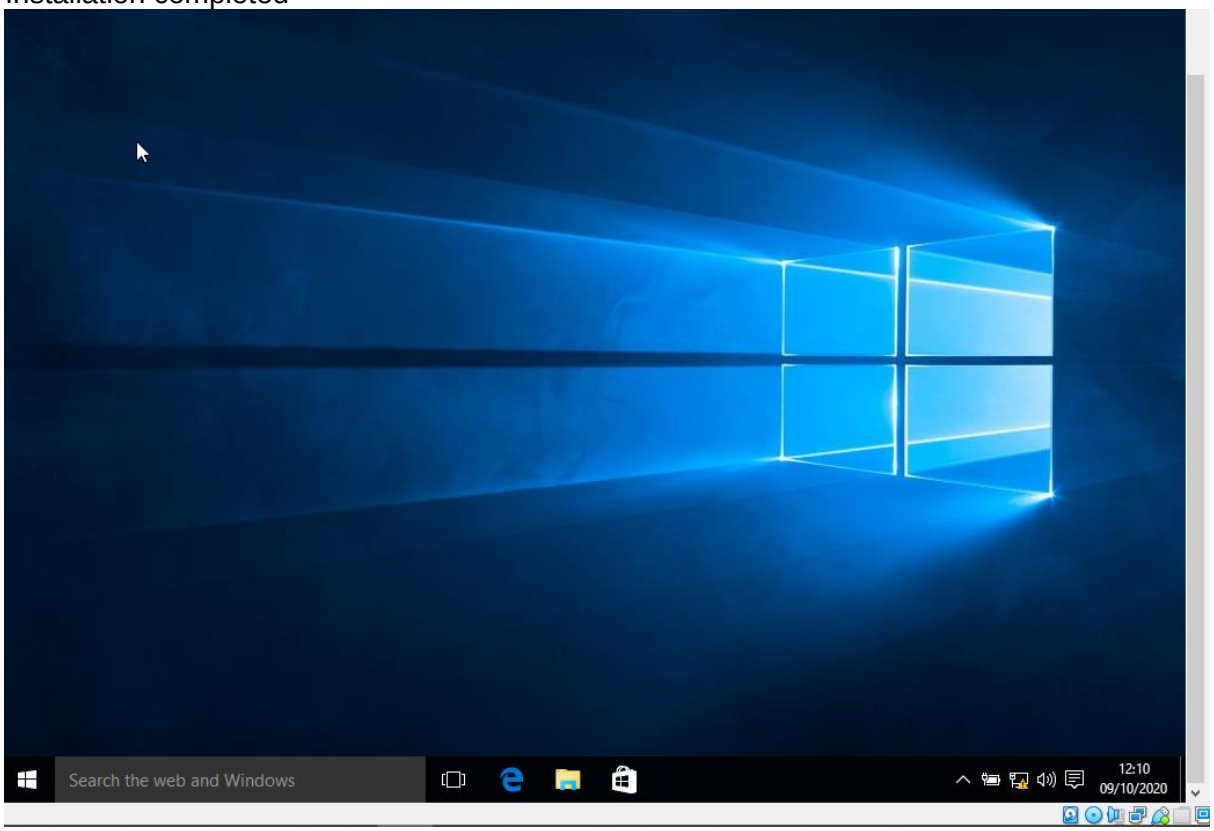
Using express settings in order to speed up installation



Creating an account for “this PC”

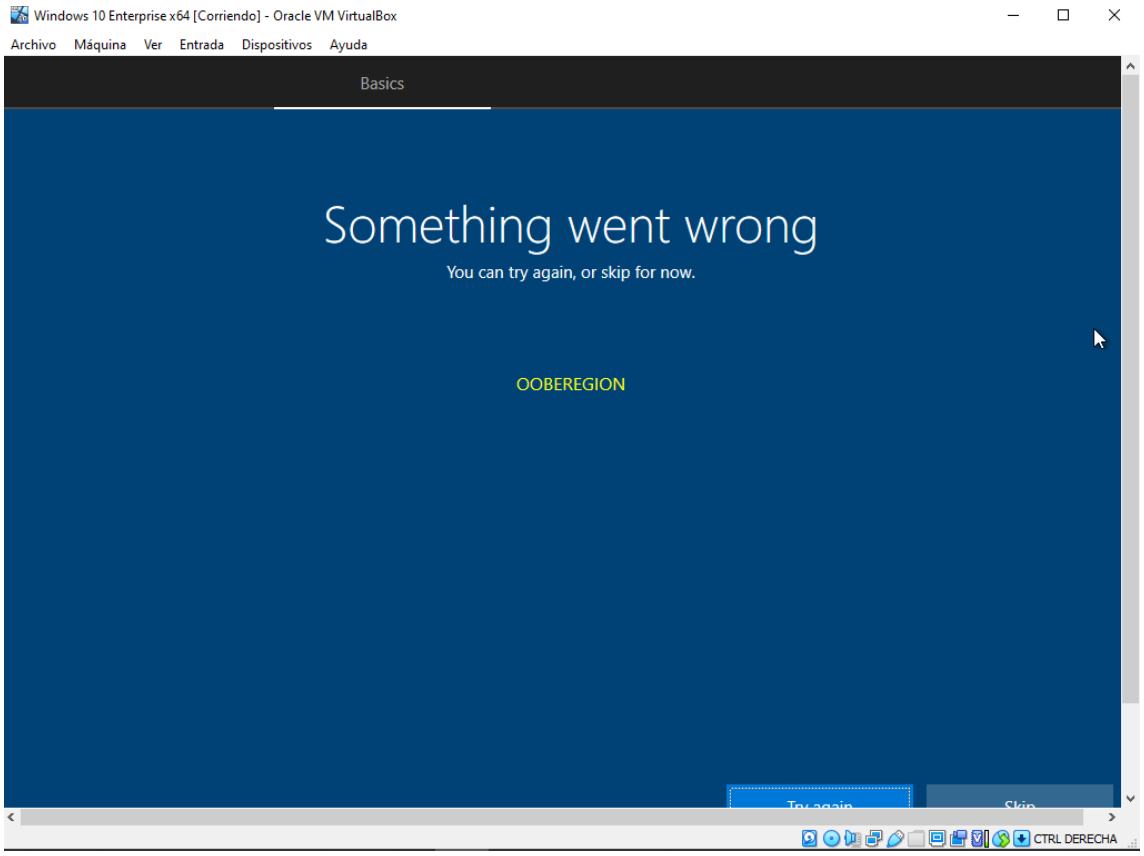


Installation completed



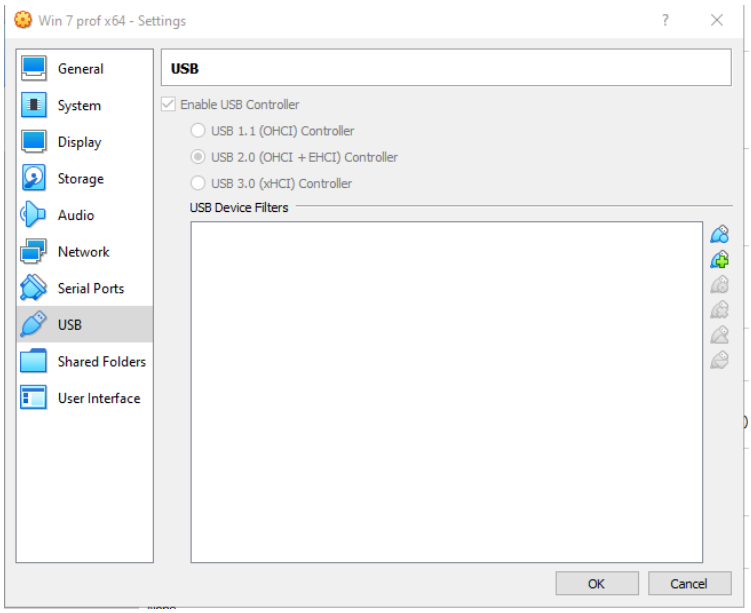
Once was installed I had problems with Windows 10 Enterprise. I rebooted it and It warned about region error. I has to reinstall it several times but I could not solve the problem so that finally I had to uninstall it.

Error with Win 10. I tried to reinstall it in several configurations many times but no way…

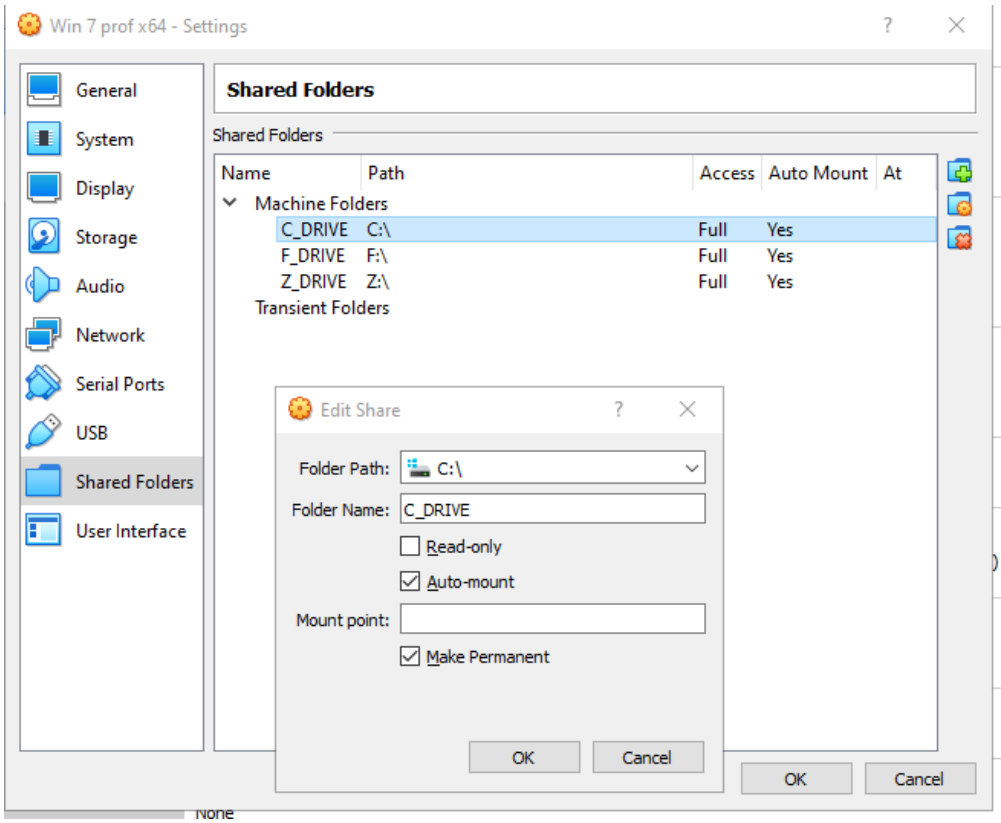


I tried **Windows 7 Professional x 64, which is the one I currently have installed. It is successfully working.**

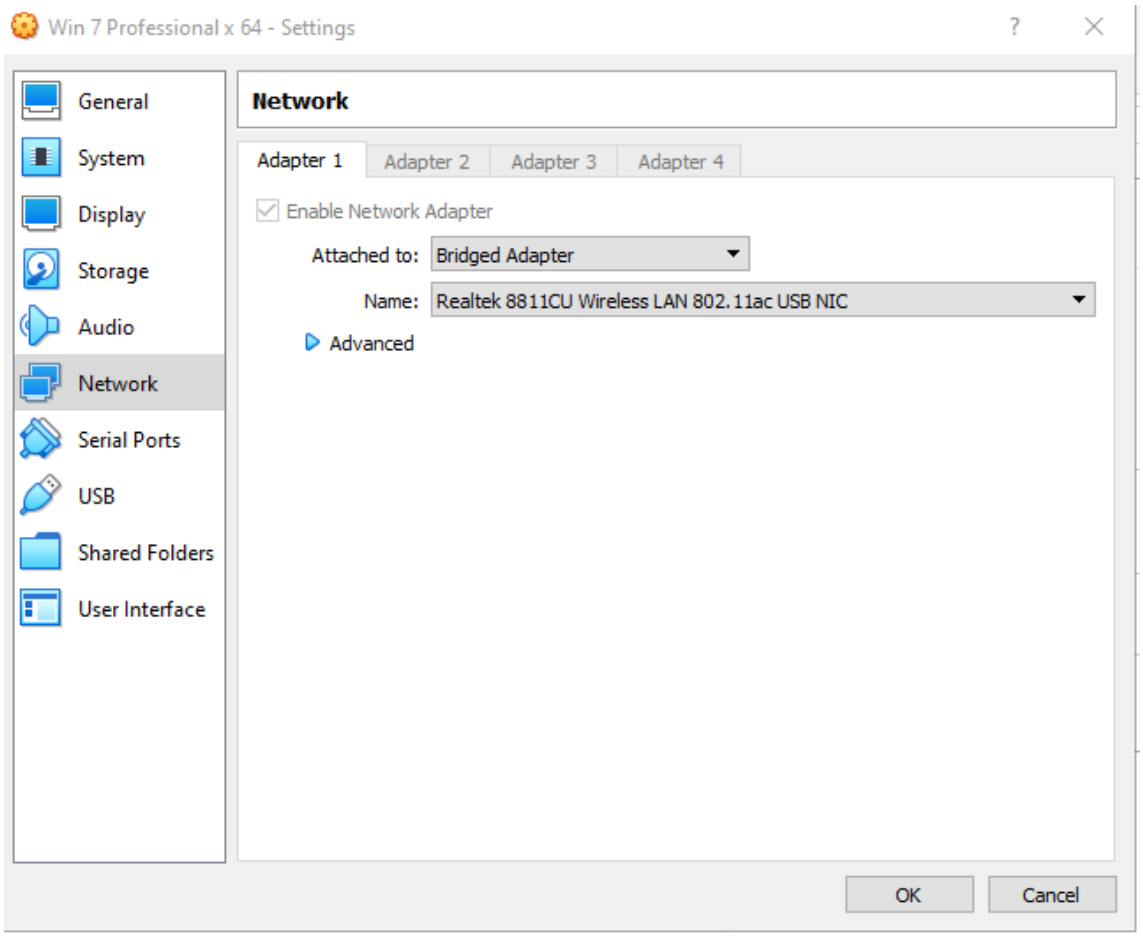
USB 3.0 support.



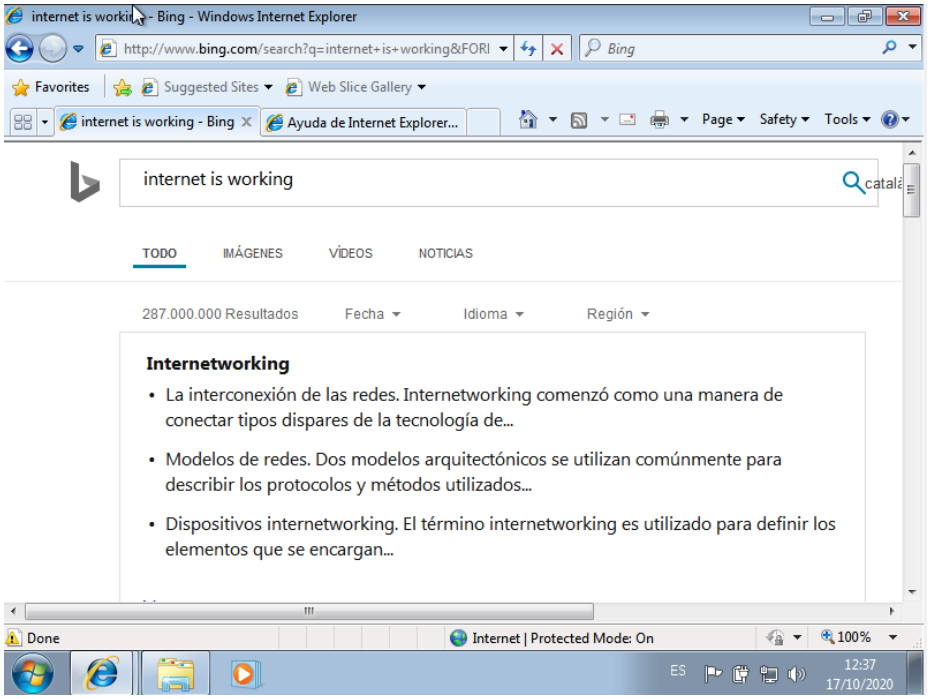
Shared folders.



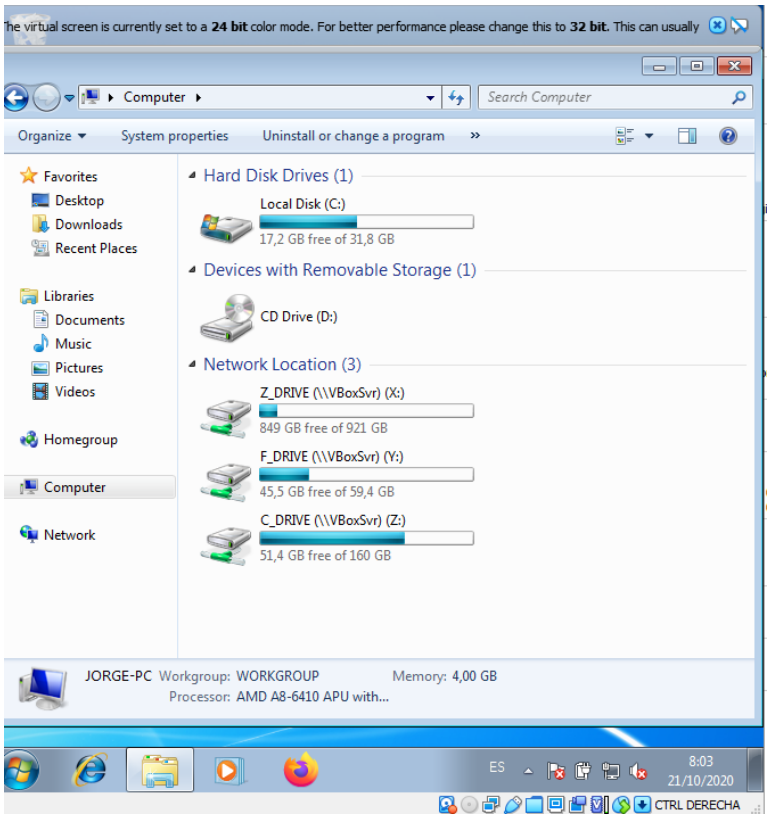
Internet connection including access to the rest of computers of the network.



Internet working

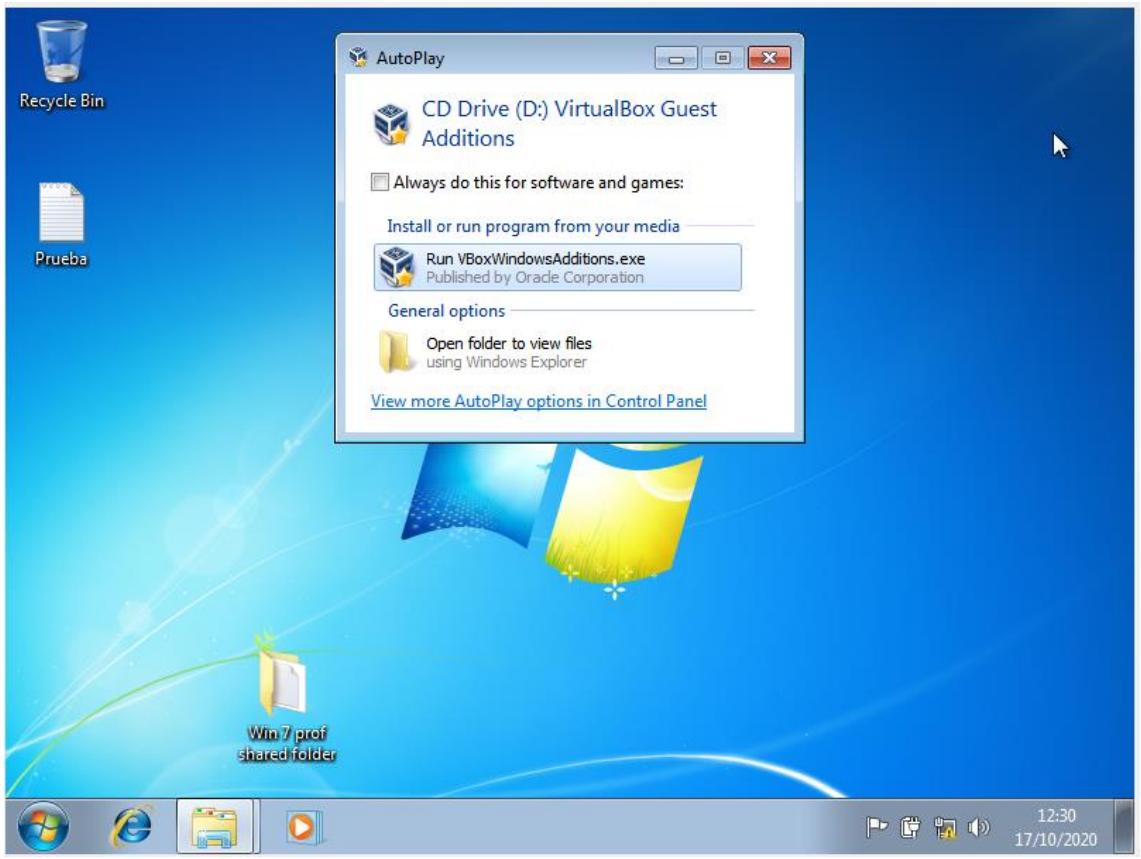


Virtual network working



You will be able to copy and paste from the host to the guest and vice versa.

Installing guest additions



I can drag, copy and paste bidirectionally.
